INTERNATIONAL INSTITUTE OF
INFORMATION TECHNOLOGY
H Y D E R A B A D

Getting Started for New Students

Compute Facilities:

The college provides high-performance computing clusters to support students in their research activities. Access to these resources is restricted to the IIIT network and may vary depending on the specific research lab. For further information, please consult your respective research lab.

Connect to the IIIT Network via the Internet (From Outside the Campus):
Certain internal sites are accessible only within the IIIT network and cannot be reached from the public Internet. To connect to the IIIT network remotely, you must download the OpenVPN configuration file and install an OpenVPN client. Detailed instructions on this process provided separately in vpn.iiit.ac.in

Authentication:
- LAN Authentication: https://self-help.iiit.ac.in/wiki/index.php/Wired_Network
- Wi-Fi Authentication: https://self-help.iiit.ac.in/wiki/index.php/Wifi_Network
- CAS: We use CAS for most of the Applications to authorize. You need to use your LDAP password in CAS.

Accessing Moodle:
Moodle serves as our Learning Management System (LMS). It can be accessed by visiting the platform and logging in using your CAS credentials.

Accessing Mail, MS Teams, Office Apps and OneDrive:
We utilize the Office 365 suite for email and various other services. You can access all Microsoft services including Outlook (Mail), OneDrive, Office applications, and Microsoft Teams by visiting the platform and signing in using your CAS credentials.

Institute Provided Software:
You can find the details of institute provided software list here.

Accessing the Internet when on campus:
- You can use either the Wi-Fi or the LAN to connect to the IIIT Network. Check the authentication section on how to authenticate.

Installation and accessing of MATLAB: Go here

Seek Help (IT):

- Visit Help portal to raise a help ticket.

Seek Help (Academic):

- Please email with your roll number and your course name to:
  - help.academics@lists.iiit.ac.in
